

TRADE-IN OFFERS

JANUARY 2009 - DECEMBER 2009

END OF LIFE NOTIFICATION FOR OBSOLETE LDS POWER AMPLIFIERS

This Notification is to advise users that as of the **December 31st 2009** all support including maintenance, repair and spares for obsolete LDS Power Amplifiers will cease. The Amplifiers directly affected are:-

Air cooled Vibration Systems:-

- TPO, MPA, DPA & DPA-K range 2, PA2000 series Power Amplifiers
- Replacement Amplifier:- SPAK Single bay series

Water cooled Vibration Systems:-

- MPA & MPA-K series Power Amplifiers
- Also affects early versions of the current DPA-K range 1 series with Mark 2 & 3 Power Modules. In this case Power Modules only need to be replaced.
- Replacement Amplifier:- SPAK Twin bay series

These Amplifiers have served the vibration testing community well for many years. LDS Test and Measurement has supported these Amplifiers over the last decade-significantly beyond their original of life dates. With many of the spares no longer commercially available, and with stocks depleted, it has become impossible to provide appropriate support.

LDS understands that this Notification may cause difficulty, so we are pleased to offer a special Trade-In opportunity. For a limited time you can trade in your old Power Amplifier for the latest SPAK technology with fantastic savings off the List Price.

This offer is valid provided we are in receipt of a purchase order by **December 31st 2009**

Please contact the LDS Test and Measurement Sales Team on

01763 255255 for more information

ADVANTAGES OF UPGRADING

Replacing your old amplifier with the latest LDS SPA-K or DPA-K Power Amplifier means that:-

- You greatly extend the life of your current Vibration Test System.
- You are investing in proven, reliable technology from a trusted and reputable UK manufacturer.
- The new amplifier is perfectly matched to your existing LDS Shaker-no loss of performance or risk of incompatibility.
- Your investment is future-proof. Should you need to upgrade to a new LDS Shaker in the future the Power Amplifier is already in place. You just need to add the appropriate Shaker!

WHAT ARE THE SAVINGS

Trade in any legacy Power Amplifier (or mark 2 and 3 power modules in the case of the DPA-K range 1) within the period of the offer, and receive a discount of 20% off the List Price.

Notes: This offer cannot be combined with any other special discount offers.

TRADE-IN OFFERS

JANUARY 2009 - DECEMBER 2009

END OF LIFE NOTIFICATION FOR OBSOLETE LDS POWER AMPLIFIERS

WHAT ELSE DOES THE REPLACEMENT AMPLIFIER PACKAGE INCLUDE?

You also get the new LDS Remote Amplifier Control Software. This unique software package can be loaded on to your vibration controller PC to enable remote control of the SPAK amplifier, making Vibration engineering more simplistic.

HOW QUICKLY CAN I BE OPERATIONAL WITH THE NEW AMPLIFIER?

LDS Replacement Amplifiers are available on very short lead-times to meet critical client testing programmes. Typically SPA-K Amplifiers can be delivered 3-4 weeks from order; DPA-K Amplifiers 10-12 weeks.

I HAVE AN OLD DERRITRON VIBRATION SYSTEM. CAN THE LDS REPLACEMENT AMPLIFIER OFFER HELP ME?

Yes. LDS has an excellent record with third party vibration systems. All requests will be reviewed by LDS Special Projects team to provide the optimum solution. More customers with legacy third party systems are turning to LDS – with nearly 50 years of trading we have extensive experience, products, service and technical support!

This offer is valid provided we are in receipt of a purchase order by **December 31st 2009**
